Honeywell Aerospace Technologies

Approved Processors Source List (APSL)

This is to certify that source ELEMENT CINCINNATI TESTING is approved to perform the following listed Special Processes.

Supplier Name: ELEMENT CINCINNATI TESTING

AERO ID: 058396268

Address: 3701 PRT UNION RD, FAIRFIELD, OHIO, 45014, UNITED STATES

PRI Number: 7874

Date (Download): 07-Jul-2026

Please note that supplier status may have changed since the date of download. The on-line APSL shows the current status.

Uncontrolled If Printed

Process	Status	Comments / Restrictions	Expiration*	Nadcap	SCA	Periodic Maintenance Audits
SPECIALTY SPECIMEN MACHINING (EDD)	Approved	SUPPLIER APPROVED TO PERFORM ONLY LOW STRESS GRIND (Z1), LOW STRESS GRIND AND POLISH (Z2) AND SPECIAL PREPARATIONS (Z4).	25-Mar-2029	NA	Required	HOAT2*
SPECIALTY MECHANICAL TESTING (EDD)	Approved	SUPPLIER APPROVED TO PERFORM ONLY THERMAL MECHANICAL FATIGUE (TMF) TESTING.	25-Mar-2029	NA	Required	HOAT2*

FRACTURE TESTING (EDD)	Approved	Supplier approved to perform Fracture Toughness (code P), and Crack Growth Propagation (code XE)	25-Mar-2029	NA	Required	HOAT2*
FATIGUE TESTING (EDD)	Approved	Supplier approved to perform Load Control Fatigue (code O) and Strain Control Fatigue (code Y)	25-Mar-2029	NA	Required	HOAT2*

Uncontrolled If Printed

Process	Status	Comments / Restrictions	Expiration*	Nadcap	SCA	Periodic Maintenance Audits
TENSILE TESTING (EDD)	Approved	Supplier approved to perform Room Temperature Tensile (code A) and Elevated Temperature Tensile (code B)	25-Mar-2029	NA	Required	HOAT2*
SPECIMEN MACHINING (EDD)	Approved	Supplier approved to perform Standard Specimen Machining (code Z)	25-Mar-2029	NA	Required	HOAT2*

Uncontrolled If Printed

*Expiration dates are set based on the expiration dates for Nadcap certificates, SCA certificates (If there is more than one SCA, the latest exp. should apply), Honeywell audit due date, or applicable exemption expirations, whichever comes first.)

Supplier approval for the above listed processes depends on continuing to meet Honeywell APSL approval requirements, including Nadcap certifications, SCA certifications and responsibilities, and cooperation with Honeywell on-site or desktop audits, as required. Probation status identifies that there are issues that need to be addressed, and that additional Honeywell oversight may be required until resolved, but processing may continue within the bounds of any limitations imposed. Probation - Approval Suspended status indicates that Honeywell products shall not be processed or shipped.

Once approved, the Processor must continue to meet all process approval requirements. They must keep their quality system certifications up-to-date. Periodic maintenance audits (either Honeywell or Nadcap) will be performed to ensure compliance. Honeywell maintenance audits will be either onsite or technical desktop audits. For Nadcap-applicable processes, periodic verification of Nadcap Accreditations, Source Certifying Agents (as applicable) and processor information are performed. See the Honeywell APSL Home page and Process definitions, Honeywell SPOC Manual, and SI-165-01 for these requirements.

Uncontrolled if printed
